

AMENDMENTS TO THE SPECIFICATION

Please amend paragraph [0029] as follows:

Referring to FIG. 1, in accordance with one or more embodiments of the invention, an interactive optical disc or enhanced navigation device (e.g., I-DVD or ENAV) player 100 comprises an optical pickup 11, an I-DVD system 12, a microcomputer 13, a buffer memory 14, and an interface 15. The I-DVD player 100 is connected to a content server 300~~content server 30~~ through the interface 15.

Please amend paragraph [0030] as follows:

Further, the I-DVD system 12 comprises a DVD engine for reproducing and outputting audio/video (A/V) data read from the I-DVD 10, and an ENAV engine or enhanced navigation engine for reproducing and outputting content data provided from the ~~content server 30~~ content server 300 and content data read from the I-DVD 10. This invention in accordance with one or more embodiments is described as applicable to an I-DVD or ENAV disc and player. This application is, however, by way of example. It should be understood that other embodiments of the invention may be applicable to any type of recording medium or player.

Please amend paragraph [0033] as follows:

The ENAV engine of the I-DVD system 12 performs a synchronization operation for the A/V data and ENAV contents data read from the I-DVD 10 to output the synchronized data, or

performs the synchronization operation for the A/V data and another ENAV content data provided ~~from~~ from the CONTENT server 300 to output the synchronized data.

Please amend paragraph [0046] as follows:

An eighth operating state (State 8) can be defined as a state where a play operation for the video data read from the I-DVD by the DVD engine is temporarily stopped, a still picture is continuously outputted and displayed, and simultaneously the ENAV engine is completely stopped.

Please amend paragraph [0047] as follows:

A ninth operating state (State 9) can be defined as a state where a play operation for the video data read from the I-DVD by the DVD engine is completely stopped, and simultaneously an operation of the ENAV engine is completely stopped. For example, when a system power of the I-DVD player is in an ON state, the ninth operating state corresponds to a system initial booting operation or an optical disc loading operation.
